feature descriptions

Daniel Jackson
### What’s a feature description?

<table>
<thead>
<tr>
<th>yes</th>
<th>no</th>
<th>separation of concerns!</th>
</tr>
</thead>
<tbody>
<tr>
<td>short &amp; to-the-point</td>
<td>long-winded &amp; chatty</td>
<td></td>
</tr>
<tr>
<td>about what feature does</td>
<td>about why feature exists</td>
<td></td>
</tr>
<tr>
<td>emphasis on novelty</td>
<td>stating the obvious</td>
<td></td>
</tr>
<tr>
<td>just an overview</td>
<td>details of flow or data</td>
<td></td>
</tr>
<tr>
<td>separate &amp; self-contained</td>
<td>diffused in a narrative</td>
<td></td>
</tr>
<tr>
<td>set of related actions</td>
<td>single action</td>
<td></td>
</tr>
<tr>
<td>has a nice name</td>
<td>title missing or unhelpful</td>
<td></td>
</tr>
</tbody>
</table>
example: google drive
Your memories, safe & secure
Powerful search

Google Drive helps you get to your files faster by recognizing objects in your images and text in scanned documents.
View anything

View over 30 file types right in your browser—including HD video, Adobe Illustrator and Photoshop—even if you don’t have the program installed on your computer.
Get stuff done offline

If you use Chrome, you can turn on Drive offline to create, edit, and comment on Docs, Slides, and Drawings and view Sheets when there’s no network connection.
Chat, discuss & mentions

Connect with others by chatting right inside Docs, Sheets, and Slides, or leave comments on files and images. Add a + in front of an email address in a comment and Drive will send them an email so they know to follow up.
Go back in time with revision history

Google Docs, Sheets, and Slides automatically save and track every change you make, forever. You can also look back as far as 30 days on other file types, making it easy to see who has made changes and restore previous versions.
example: lightroom
NEW Advanced Healing Brush
Don’t let dust spots, splotches, or other distractions and flaws get in the way of a great shot. With the Advanced Healing Brush in Adobe Photoshop Lightroom 5, you can not only change the brush size but also move it in precise paths. Unwanted scene elements — even those with irregular shapes such as threads — just disappear.

NEW Upright
Straighten tilted images with a single click. The new Upright™ tool analyzes images and detects skewed horizontal and vertical lines, even straightening shots where the horizon is hidden.

NEW Radial Gradient
Emphasize important parts of your image with more flexibility and control. The Radial Gradient tool lets you create off-center vignette effects, or multiple vignetted areas within a single image.

NEW Smart Previews
Easily work with images without bringing your entire library with you. Just generate smaller stand-in files of your full-size images. Any adjustments or metadata additions you make to these files will automatically be applied to the originals.
examples: TeamNote
Feature Descriptions:

User accounts: Users can create separate accounts to keep their notes private.

Adding new notes: Users can add a new note by clicking the "New Note" button, entering the text of their new note, and clicking submit.

Viewing old notes: Users can view notes that were previously written by them or another user.

Show note: Users can focus on one note at a time by clicking "Show Note".

Editing notes: Users can change the text of previously written notes by clicking "Edit".

Destroying notes: Users can delete notes by clicking "Destroy".
Features

- **User Authentication** Users may sign up with an email and log in. Their session is saved even when they close the browser, until they log out or clear their cookies.

- **Access Control** Users may only view their own notes and listing of notes. They do not have access to view/edit/create/destroy other users' notes.
example: TeamNote

Note management. Create, edit and delete short text notes. Convenient listing and search functions to find notes easily.

Safe storage. Notes are stored securely in the cloud, backed up and encrypted.

Team sharing. Members of a team can share the editing of a note (so long as they don’t edit simultaneously).

Access control. The creator of a note decides who can access the note, and what actions they can perform.

Offline editing. Notes can be edited offline, and will be synced next time the user goes online.
