Project Pitch

Team Coordinate
Purpose, goals and context

- students get takeout and want to coordinate currently do by texting, phone calls
- need system to coordinate orders
- system would automatically place the order goal is to make the process easier, quicker and more efficient
key features and concepts

* main feature is coordinating the menu orders amongst a (potentially large) group of students
* other key features will be placing the orders and keeping track of the deliveries
* the key concepts are:
  * restaurants
  * takeout orders
  * student
risks and mitigations

* the app may be complex and getting it to connect to the restaurant’s servers may take a lot of work
* risk of not being able to make a responsive interface; mitigation is using jQuery
* risk of system not performing quickly enough; mitigation is optimizing code
* the mobile component of the app may be hard to implement
* not clear how to store the number of menus that will be required
